

# » Know what's going on . . . wherever they are!

They're a long way away, do you know what's happening right now?

## TracerTrak™ - AlarmTrak

- » **Monitor** your asset alarms with Australia-wide coverage\*
- » **Be alerted** via SMS and email when unauthorised activity occurs
- » **Secure** your asset anywhere in Australia and it's surrounding waters\*
- » **Never lose** track of your valuable infrastructure
- » **Monitor** up to four external alarm inputs

The screenshot shows the TracerTrak AlarmTrak web interface. At the top, it says 'Know where they are, wherever they are.' and 'Powered by tenzeng'. The interface includes tabs for 'Locations', 'Broadcasts', 'Alarms', 'Alerts', and '2-way SMS'. A list of assets is shown on the left, including 'Gyaltiner (D-419602)', 'Brian (D-607111)', 'Calms 2 (D-419565)', 'CGMoolie (D-406366)', 'DamerM (D-486154)', 'Dubbo (D-406365)', 'Eastern Truck (D-406358)', 'EPA1 (D-419576)', 'Sales MMT (D-608090)', 'Sales T3 (D-419577)', and 'Test 1 (D-406357)'. A 'Time Period' section allows filtering by 'Today', 'Yesterday', 'Last 10 days', or 'Between' dates. A 'Type' section lists alarm types: 'Device Input', 'Geofence Breach', 'Home Area Breach', 'Missing Broadcasts', 'Motion Sensor', and 'Unauthorised Movement'. A table at the bottom shows a list of alarm events with columns for 'Date/Time Initiated', 'Asset (Serial Number)', 'Type (Details)', 'Date/Time Acknowledged', 'Acknowledged by', and 'Date/Time Ended'.
